### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5, 8 13-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Kitano et al (6,528,959).

As per claim 1, Kitano discloses determining a tractive force request of a driver of the vehicle; determining an actual tractive force of the vehicle; and modifying the actual tractive force of the vehicle to be equal to the tractive force request (column 3, lines 35-48, column 7, lines 18-24, 57-67 and figures 2, 3, 29).

As per claim 2, Kitano discloses measuring the actual speed of the vehicle (column 3, lines 32-33); sensing a position of the acceleration pedal (column 12, lines 14-17); looking up the tractive force request corresponding to the actual speed and the position of the acceleration pedal (abstract).

Art Unit: 2144

As per claim 3, Kitano discloses modeling the actual tractive force (abstract).

As per claims 4 and 14, Kitano discloses modeling the tractive force as a function of the vehicle speed (abstract).

As per claims 5, 8 and 15, Kitano discloses a percentage of maximum available tractive force of the vehicle (column 41, lines 1-15).

As per claim 13, Kitano discloses determining a tractive force request of a driver of the vehicle; determining an actual tractive force of the vehicle; and modifying the actual tractive force of the vehicle to be equal to the tractive force request (column 3, lines 35-48, column 7, lines 18-24, 57-67 and figures 2, 3, 29); measuring the actual speed of the vehicle (column 3, lines 32-33); sensing a position of the acceleration pedal (column 12, lines 14-17); looking up the tractive force request corresponding to the actual speed and the position of the acceleration pedal (abstract) and modeling the actual tractive force (abstract).

***Allowable Subject Matter***
